SATISH CHANDRA MEMORIAL SCHOOL CLASS-VIII

SUBJECT-MATHEMATICS

CHAPTER-DATA HANDLING

1. The marks scored by 20 students in a test are given below: 84, 57, 53, 89, 41, 57, 47, 64, 58, 44, 53, 72, 51, 78, 71, 62, 56, 68, 54, 42 Complete the following frequency table:

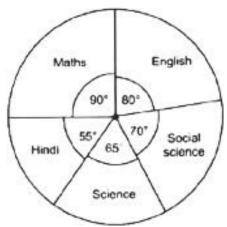

| Marks in class interval | Tally Marks | No. of students |
|-------------------------|-------------|-----------------|
| 40-50 | 2.82 | |
| 50-60 | | |
| 60–70 | | |
| 70–80 | | |
| 80–90 | | |
| | | <u> </u> |

- (i) What is the upper limit of 40–50?
- (ii) What is the upper limit of 70–80?
- (iii) What is the class size?
- (iv) Which interval has the maximum frequency?
- (v) Which interval has the minimum frequency?
- (vi) The score 51 will lie in which interval?

2. Draw a histogram for the daily earnings of 30 general stores given in the following table:

| Daily earnings (in Rs) | Number of general stores | |
|------------------------|--------------------------|--|
| 1450-1500 | 4 | |
| 1500-1550 | 10 | |
| 1550-1600 | 9 | |
| 1600-1650 | 18 | |
| 1650-1700 | 5 | |

- 3. A bag-I contains four cards numbered 1, 3, 5 and 7 respectively. Another bag-II contains here cards numbered 2, 4 and 6 respectively. A card is drawn at random from each bag. Find the probability that the sum of two cards drawn is 9.
- 4. In a simultaneous throw of a pair of dice, find the probability of getting:
 - (i) A doublet.
 - (ii) A doublet of prime numbers.
 - (iii) An even number on first.
 - (iv) An even number on one and a multiple of 3 on the other.
 - (v) Neither 9 nor 11 as the sum of the numbers on the faces.
 - (vi) A number other than 5 on any dice.
- 5. The following pie-chart represents the marks scored by a students. If he obtained 540 as total marks, answer the following questions:

- (i) In which subject did the student score 120 marks?
- (ii) What is the difference in the marks obtained in Maths and English?
- (iii) In which subject did he get minimum marks?
- (iv) What is the total score in Maths and Science?
- 6. If you have a collection of 6 pairs of white socks and 3 pairs of black socks. What is the probability that a pair you pick without looking is (i) white? (ii) black?
