

Class Test

Total Marks: 15

Total Time: 20 Mins

Multiple Choice Questions of 1 mark each:

1. Germinal epithelium is an example of which type of epithelium?
a) Stratified squamous b) Cuboidal c) Columnar d) Glandular
2. Internal cavity of oviducts, ventricles of brain and respiratory passages are lined by
a) Cuboidal b) Columnar c) Ciliated Columnar d) Simple Squamous
3. A person met with an accident in which two long bones of hand were dislocated. Which of the following may be the possible reason?
a) Tendon break c) Break of skeletal muscle
b) Ligament break d) Areolar tissue break
4. Which of the following is incorrect?
a) Blood has matrix containing protein and other molecules
b) Two bones are connected with ligament
c) Tendons are non-fibrous tissue and fragile
d) Cartilage is a form of connective tissue
5. Which of the following helps in repair of tissue and fills up the space inside organ?
a) Tendon b) Adipose c) Areolar d) Adipocyte
6. The cells of epithelial tissues are _____ packed with _____ intercellular matrix.
a) Loose, little b) Loosely, large c) Compactly, little d) Tightly, large
7. Which of the following is not correct with respect to the epithelial tissue?
a) It covers the external surface of body and internal surface of many organs
b) The neighbouring cells are held together by cell junctions with very little intercellular matrix
c) The epithelial cells rest on basement membrane that separates it from underlying connective tissue
d) There is no blood vessel supplying the nutrients to epithelial cells
8. Phagocytosis is performed by
a) Monocyte b) Neutrophil c) Mast cell d) Both a and b
9. Which of the following WBC has a lobed nucleus?
a) Basophil b) Monocyte c) Lymphocyte d) All of them
10. Cartilages are not found in
a) Nose b) Ear c) Larynx d) Kidney
11. Bone matrix is rich in
a) Fluoride and Calcium c) Calcium and Phosphorus
b) Calcium and Potassium d) Phosphorous and Potassium
12. Platelets are produced from
a) Monokaryocyte b) Mesokaryocyte c) Microkaryocyte d) Megakaryocyte
13. Red blood cells:
a) Helps in carrying oxygen c) Are enucleated
b) Less in number than Platelets d) Both a and c
14. Lymph has
a) WBC b) Sugars c) Proteins d) All of them
15. Glandular epithelium can be found in
a) Salivary gland b) Pancreas c) Lung d) All of them
