

THE FARMER

The farmer is a great friend of our society. He cultivates lands and grows crops for us. The farmer lives a very hard and simple life. He is busy from morning till evening. He gets up early in the morning and goes to his field with his cattle. He ploughs his lands, sows seeds, gives water to plants and reaps the crops. The farmer gives us our food. Without him, we would starve. The farmer is really a true and noble son of our country.
