

The longest step:

- Length is a measurement of how long something is, from one end to the other.
- Non standard units of length:
Hand span, cubit, footspan, finger width or any object like box, paper clip etc.

* Standard unit of measurement:

A measuring unit which is widely used and is common is called a standard unit.

- Standard unit of length:
 - 1) Centimetre (cm)
 - 2) Metre (m)
 - 3) Kilometre (km)

1 metre = 100 centimetre

 - We use a ruler, measuring tape etc. to measure length.
