

Assertion -Reason:

1) Assertion (A): We should measure the length of a classroom in metres rather than centimetres.

Reason (R): Metres are used for measuring small objects, while centimetres are used for big objects.

Ans:-

2) Assertion (A): We should always use non standard units in measurement.

Reason(R): Non standard units can not give us correct measurement.

Ans:-

3) Assertion (A): 13 kg is greater than 130 g.

Reason (R): for comparison we should convert 13 kg into gram.

Ans:-
