2. The Sun greets the world every morning with its bright sunshine.

- Suggest two ways the Sun helps living beings on Earth.
- How does the colour in the sky changes at the time of sunrise?
- Write the antonym of the word 'bright'.

Answer -

- The Sun helps living beings on Earth by giving heat, light and energy. All living beings are dependent on the Sun for its heat and energy.
- The colour in the sky becomes reddish orange at the time of sunrise.

- The antonym of the word 'bright' is dark or dull.
