

CASE STUDY

Daisy and Lou are very excited to go to a trip with their family. The family makes a list of things to buy. The list is given below:-

Items	Cost for 1 kg
Custard Apple	₹45
Sapota	₹70
Banana	₹55
Papaya	₹65
Potato	₹37

Answer the following questions:-

1. Find out the total price of 1 kg custard apple and 1 kg sapota.
2. Which is the most expensive item in the list?
3. Estimate the difference between the price of 1 kg papaya and 1 kg of banana.
4. If Daisy has bought custard apple, sapota and papaya. But she has ₹217. Write the name of the item which she can buy with the remaining money.
