

My Gardening Activity

For this activity, I selected a **name of the plant** and used a gardening tool to care for it. This activity helped me understand that plants require regular care to grow healthy and strong.

Working with My Gardening Tool

I used the same gardening tool to perform gardening work such as digging the soil, removing weeds, or loosening the soil around the plant. Working in the garden was enjoyable and taught me the value of hard work and caring for nature.

What I Learned

- Plants need regular care, water, sunlight, and nutrients.
- Gardening helps keep our surroundings green and clean.
- Growing vegetables at home provides fresh and healthy food.
- Gardening develops responsibility, patience, and practical life skills.
