

Q9) We pollute water in many ways. What is the impact of this on aquatic animal's life?

Ans - Water pollution can make aquatic animals sick or injured. Less oxygen can cause breathing problem for them and can kill them.

Q10) Define soil. Name some animals whose habitat is soil.

Ans - Soil is the loose , upper layer of the Earth's surface , where plants grow.

Earthworms , rabbits , snakes , ants etc. live in and under the soil.
